SIMULATORS

SINGLE SEATER SIMULATOR

The BPS single-seater simulator provides a fully immersive environment for driver development. The choice of many drivers from F4 to F2, the BPS sim has been a key factor in many championship victories around the world. It can be used as a static simulator or it can be fitted to a 6-DOF motion platform, depending on requirements and space available.

SUCCESS THROUGH SIMULATION

Base Performance Simulators (BPS) is one of the UK's leading simulation companies, led by three-time Le Mans winning Aston Martin factory driver, Darren Turner. We use our knowledge and experience of simulation to create bespoke simulators for teams, drivers, professionals, amateurs and corporate initiatives. We work with all of our clients to find the perfect simulator solution every time.

OUR SINGLE SEATER SIMULATORS INCLUDE:

- ▶ Bespoke BPS-2 pedal box system
- ▶ Electronically adjustable sliding pedal box
- ▶ Wide choice of steering wheels, including XAP steering wheel with integrated LED display & shift lights
- ▶ 25Nm direct drive steering motor, capable of delivering detailed force feedback & replicating the real steering torque from any race car
- ▶ Fitted with FIA extraction style seat insert
- ▶ MOOG 6-DOF motion platform available as an option

PRICE: POA
