

BASE PERFORMANCE  
SIMULATORS

## GT SIMULATOR

The BPS GT Simulator provides a fully immersive experience for GT and Touring Car drivers who are used to having a roof over their head. The addition of a passenger seat provides an opportunity for side-by-side coaching, which has proved to be of great value for amateur drivers wishing to improve their craft.

### SUCCESS THROUGH SIMULATION

Base Performance Simulators (BPS) is one of the UK's leading simulation companies, led by three-time Le Mans winning Aston Martin factory driver, Darren Turner.

We use our knowledge and experience of simulation to create bespoke simulators for teams, drivers, professionals, amateurs and corporate initiatives. We work with all of our clients to find the perfect simulator solution every time.

### OUR GT SIMULATORS INCLUDE:

- ▶ A real GT race car chassis
- ▶ Full roll cage
- ▶ Mechanically-adjustable sliding Alcon 2 or 3-pedal box complete with master cylinders, calliper, disc, braided steel hoses & fitted with 160 bar hydraulic brake pressure sensor
- ▶ Integrated cockpit brake bias adjuster
- ▶ 25Nm direct drive steering motor - capable of delivering detailed force feedback & replicating real steering torque from any race car
- ▶ Choice of steering wheels available: GT4, GT3 or bespoke
- ▶ Choice of Cosworth or MoTeC dash display with integrated shift lights
- ▶ Custom membrane switch panel allowing control of simulator software from driver's seat
- ▶ Cooling fans and LED cockpit lighting

**PRICE: FROM £103,000 + VAT**

You are welcome to visit our facility near Banbury in Oxfordshire where you can see the BPS GT simulator in action. Please call us on +44 (0) 1295 276611 or drop us a line at [info@baseperformance.net](mailto:info@baseperformance.net) to book an appointment or to chat to one of the team.
